

Footage Calculation Guide

This guide provides all the information you need to help you calculate your linear footage correctly and efficiently

Range Wall

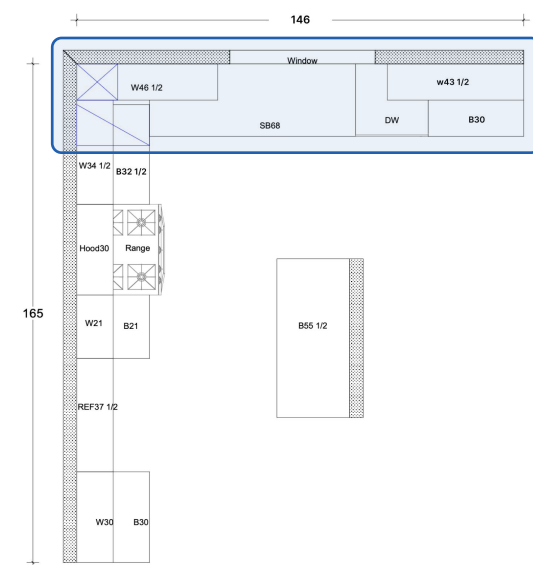

Add all Cabinets width up
(30" + 37 1/2" + 21" + 30" + 34 1/2") = 153"

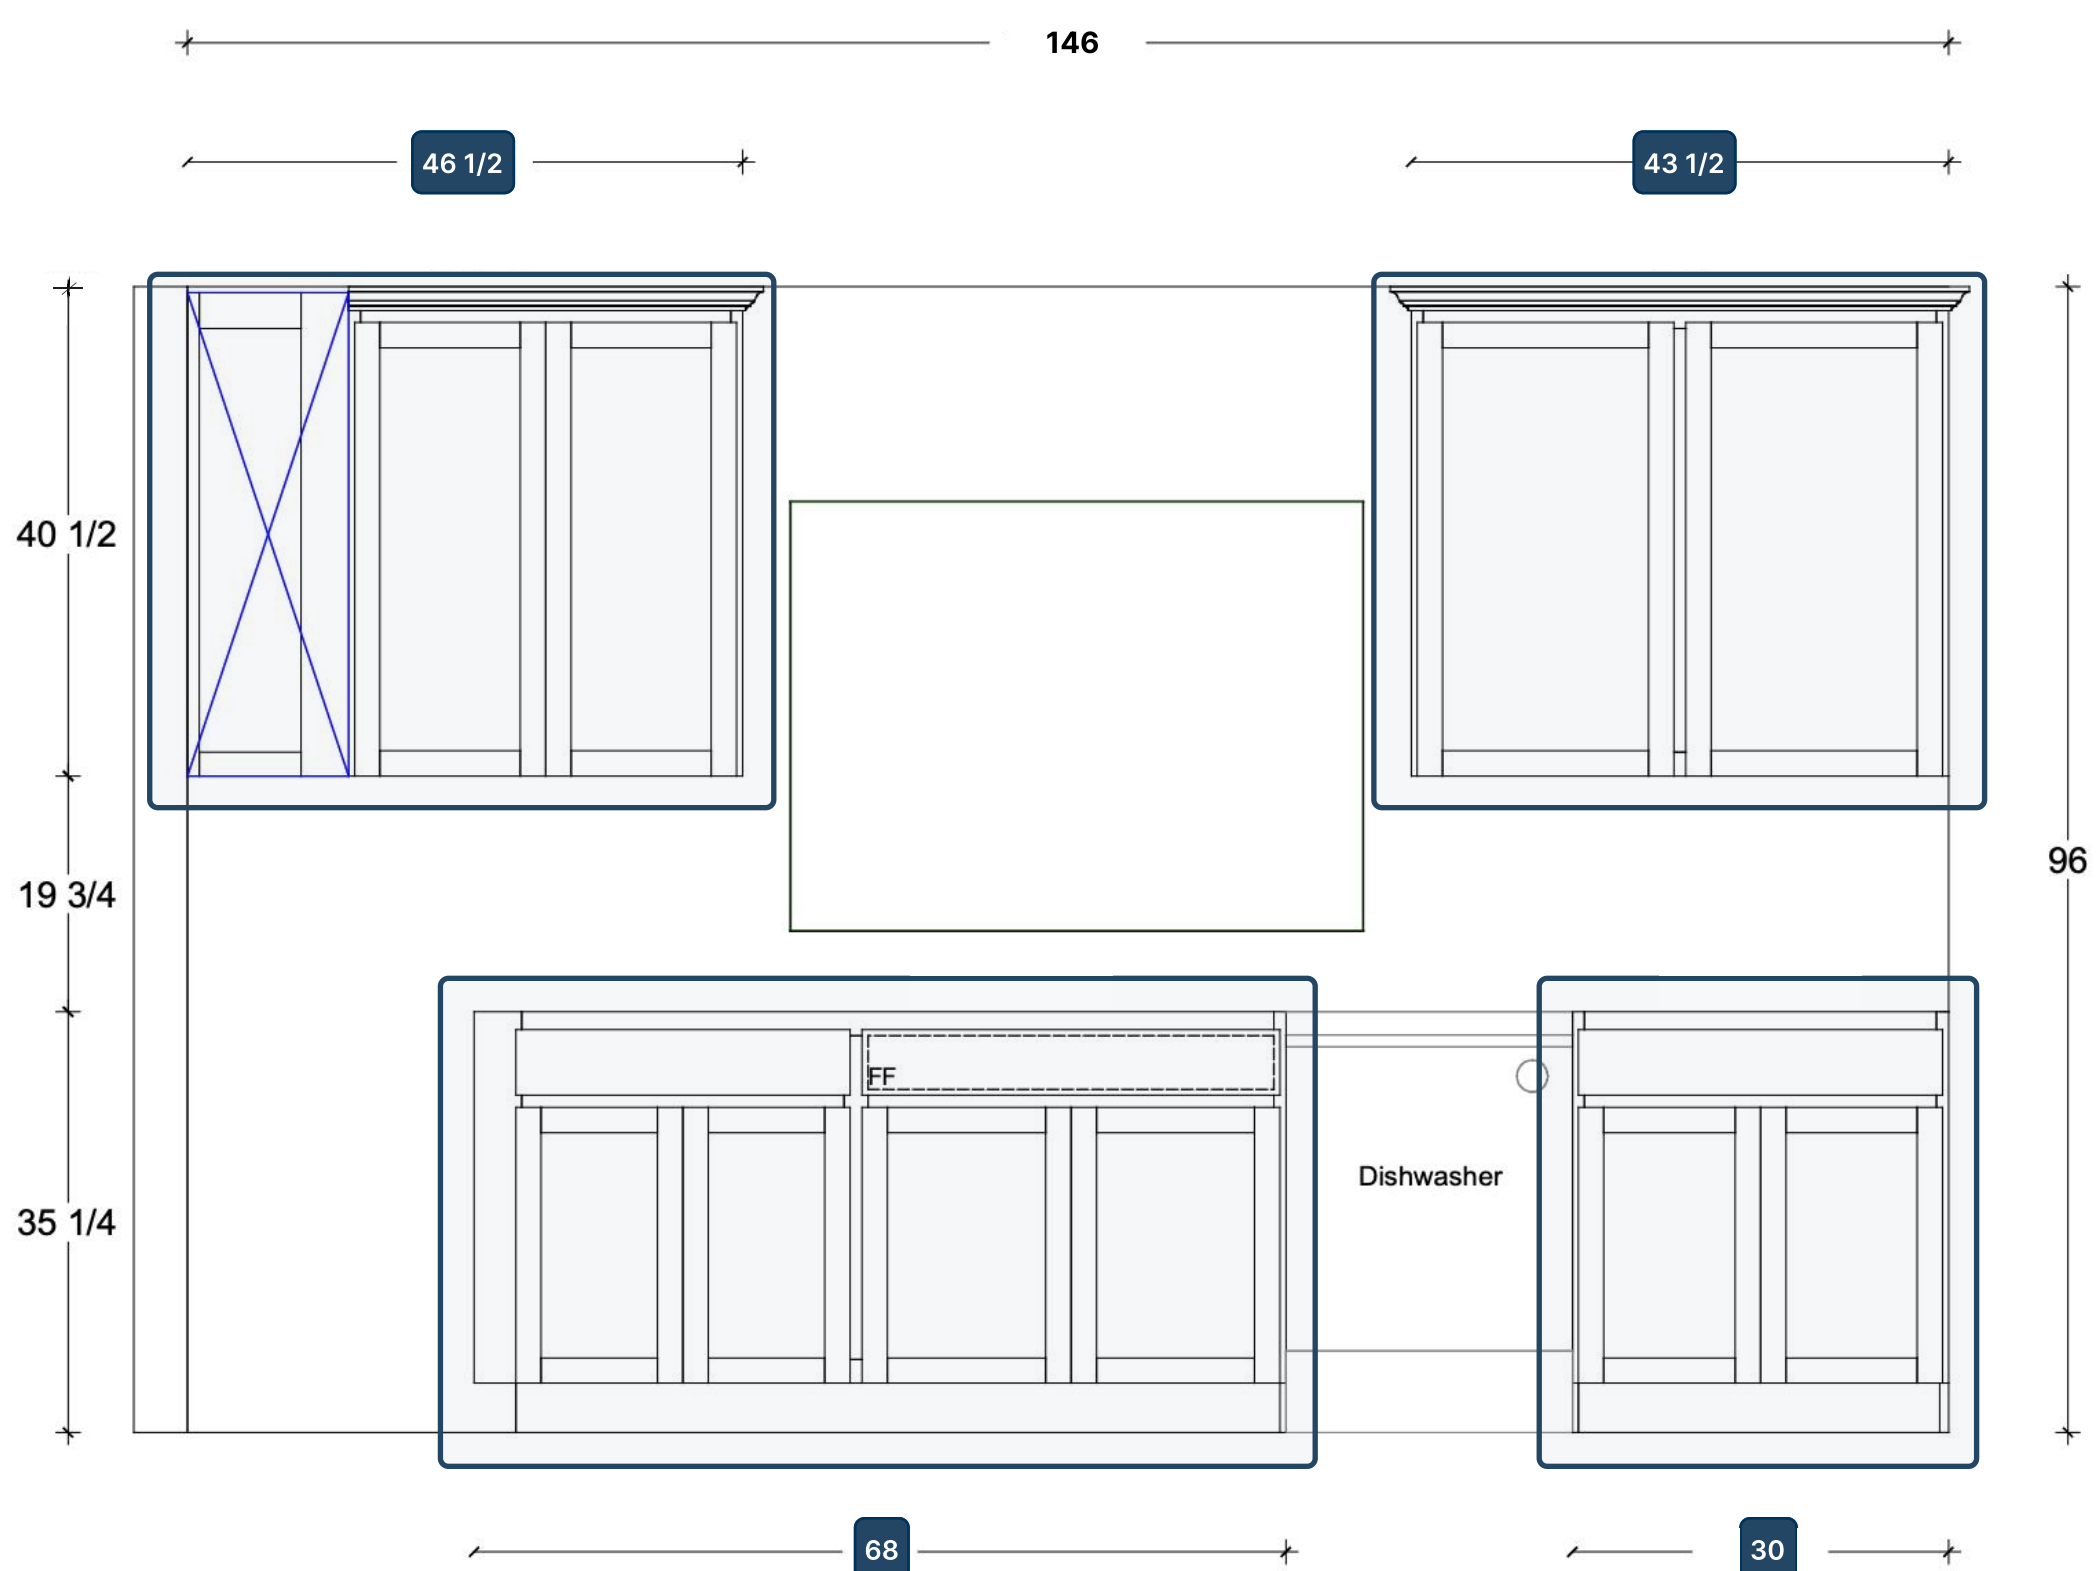

Add up all Cabinets width
(30" + 21" + 32 1/2") = 83 1/2"

Sink Wall

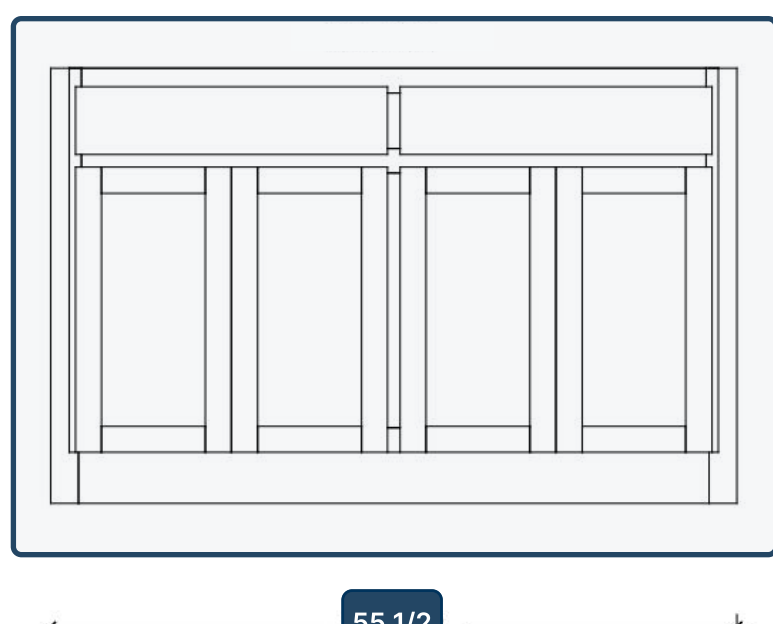

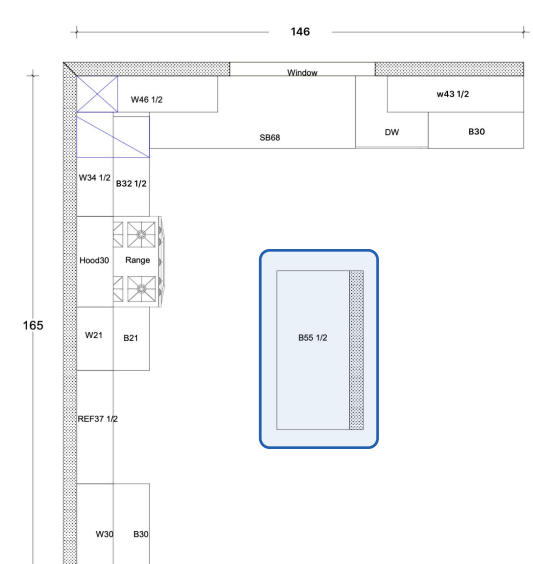

Add all Cabinets width up
(46 1/2" + 43 1/2") = 90"

Add all Cabinets width up
(68" + 30") = 98"

Island

Gather all you answers for each wall then add answers together to find your total.

Range Wall = 236 1/2"
Sink Wall (Window) = 188"
Island = 55 1/2"

(236 1/2 + 188 + 55 1/2) = 480" Total

Now divide by 12" to find linear ft (480/12) = 40 Linear ft.
